EDUCATION

Rensselaer Polytechnic Institute - GPA: 3.93

Troy, NY

Bachelor of Science in Computer Science & Information Technology and Web Sciences

May 2026

Minor in Chinese

Relevant Coursework: Data Structures, Algorithms, Database Systems, Operating Systems, Web Development, Computer Organization, Programming Languages, Managing IT Resources

EXPERIENCE

Johnson & Johnson

September 2024 - December 2024

Data Analyst

- Cleaned and standardized raw process parameter data from 18 Johnson & Johnson manufacturing sites, ensuring 100% global GMP compliance and consistency.
- Conducted Product Quality Review (PQR) analyses on manufacturing data, identifying key reporting gaps and discrepancies, improving data accuracy by 44%.
- Developed interactive dashboards in Excel and Looker Studio, providing actionable insights and reducing reporting costs by \$3,500.

Lockheed Martin

May 2024 - August 2024

Software Engineer Intern

- Refactored a customer-facing interface using Java Swing in Apache NetBeans, contributing to 2 software releases that improved functionality and user accessibility.
- Optimized Java code by implementing inheritance-based class structures, reducing code redundancy and improving maintainability, leading to 30% faster development cycles.
- Designed and optimized tracking algorithms for a search radar system using Python, MATLAB, and Excel, achieving 99% prediction accuracy when tracking hypersonic threats.

PROJECTS

Asian Cafe Website & POS System | *Next.js, Django, PostgreSQL, Dart*

December 2024 – Present

- Developed a Next.js-based web platform, optimizing SEO and enhancing customer experience for a restaurant, resulting in a streamlined ordering process and improved operational efficiency.
- Built a Django backend following the MVC architecture, with a PostgreSQL database managing 100+ menu items and 1000+ relationships to support complex order processing.
- Designed a RESTful API in Django to connect the Next.js frontend and Flutter-based POS system, ensuring seamless data flow and system scalability.
- Engineered a Flutter-based POS system for Windows and iPadOS, integrating with external hardware like a thermal printer to enhance order processing efficiency.

Cool Academic RPI Bot (CARPI) | *Python, MySQL, React*

January 2023 – May 2025

- Developed CARPI Bot, a Discord bot for academic support and student engagement, in collaboration with an open-source team using Agile, implemented features like text-based calculators and academic calendar access.
- Led a team of 5 in designing and developing the frontend for a four-year course planner website, optimizing the user experience for both mobile and desktop users.

ACTIVITIES AND LEADERSHIP

Rensselaer Polytechnic Institute | *Resident Assistant*

August 2024 – Present

- Managed a community of 100 residents, providing mentorship to foster an inclusive and engaged community.
- Resolved conflicts and addressed resident concerns, ensuring policy compliance and a positive living environment.

HackRPI Organizing Team | *Director of Marketing, Graphic Designer*

November 2022 – Present

- Led marketing and outreach efforts, designing compelling advertising campaigns and promotional materials that attracted over 1,000 registrants, making it the largest hackathons in the NY Capital region.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, HTML/CSS, PHP, SQL (Postgres/MySQL), NoSQL

Frameworks/Libraries: React, React-Native, Next.js, OpenCV, RESTful APIs, Django, FastAPI, MongoDB

Tools: Git, Figma, Microsoft Azure, Jupyter Notebook, Google Colab, Excel, Agile, Scrum
